DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 3, 8, 10, 12, 19-22, 38, 40, 43 and 46, drawn to compounds with an amine linker, classified in class 556, subclass 400⁺.
- II. Claims 2, 4, 9, 11, 13, 23-25, 39, 41, 44 and 47, drawn to compounds with an urea linker, classified in class 556, subclass 400⁺.
- III. Claims 5-7, 14-18, 26-37, 42, 45 and 48-53, drawn to methods for using the compounds of Group I and II, classified in class 536, subclass 25.3.

The inventions are distinct, each from the other because of the following reasons.

Groups I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different Groups I and II are not related to each other for the purpose of 35 U.S.C. 121 because they are structurally distinct and not disclosed as capable of being used together. The search for one is not required for the other. Applicant is entitled to only one composition of matter.

Groups I and II are related to Group III as product and method of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP

Art Unit: 1623

§ 806.05(h)). In the instant case, the process for synthesizing oligonucleotides can be used with either the compounds of Group I or II.

Although the inventions are classified in the same class and sub-classes, searching the inventions constitutes a burdensome search, as a thorough search comprises a search of foreign patents and non-patent literature as well as the appropriate U.S. patent classifications. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper. To search the three independent and distinct inventions, set forth supra, would indeed impose an undue burden upon the examiner in charge of this application.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Josephine Young whose telephone number is (703) 605-1201. The examiner can normally be reached on Monday through Friday from 8:30 a.m. to 5:00 p.m..
